

PRESIDENTIAL ELECTION RESULTS

Stephanie Core, Michael Hills, Nathaniel Witte

DATA SOURCES

- Harvard's Dataverse Repository
 - This repository provided data from 1976 to 2020
 - Site provided data for the party, state, vote counts and years
- Exploratory GeoJson maps, files & data site
 - This site provided county level data from 2000 to 2016
 - Provided county level data for the party, state, vote counts and years

PROJECT DESCRIPTION

Our mission is to visualize the US Presidential Election results from 2000 – 2016 through an interactive dashboard. The user can navigate the nation map by using a dropdown menu to display the election results numerically for each state by election year, and the map adapts a color-coded choropleth scheme proportionate to the vote counts for each party. In addition, the user can click on a state to further analyze election results by county. Finally, a line chart summarizes the total vote counts for each party by election year.
